Vista NOVA

Ignites your imagination

Fresh Curved Way-Finding System

- Curved design
- A variety of sign types
- Fits to standard paper sizes
- Easy to update
- Environmentally friendly

Vista Nova is a newly designed, curved wayfinding signage system.

The side-channels of the aluminium frames give the signs a sleek, elegant look, which cannot be ignored.

The signage types which exist in Vista Nova include:

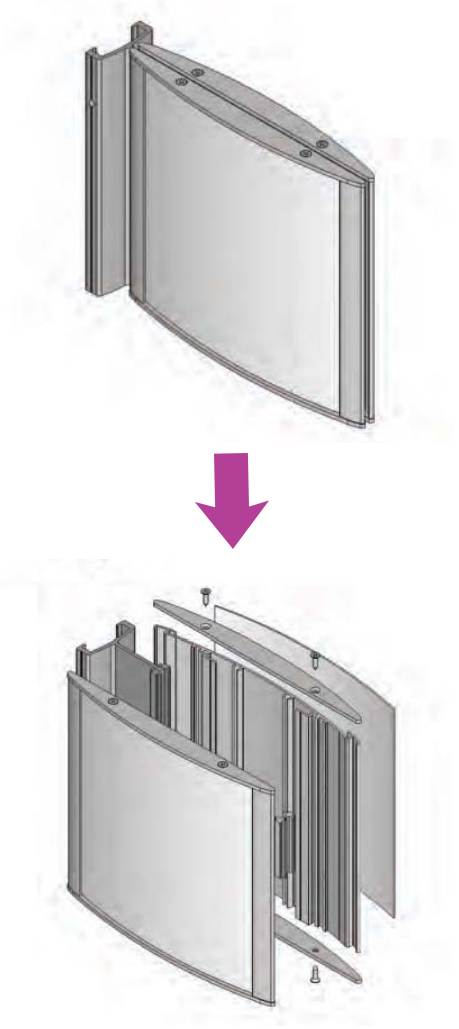

- Wall frames
- Flag signs (projecting signs)
- Suspended signs
- Table signs

The system is designed to handle most applications and materials used in the sign industry (printed-paper, engraved, embossed, screen-printed substrates, photo-metal, photo-polymer, vinyl graphics, tactile, and more). The materials used include polymers and metals of all types, plastics, paper, etc. Any material with flexibility and the correct thickness may be used as an insert with Vista Nova frames.

This modular system is composed of standard units that can be assembled in different ways to create a wide range of applications that cover the entire signage project. See for example on the right the components of a projecting sign.

Vista Nova frames can accept ADA technology inserts.
We supply ADA inserts, ask your Vista rep. about it!

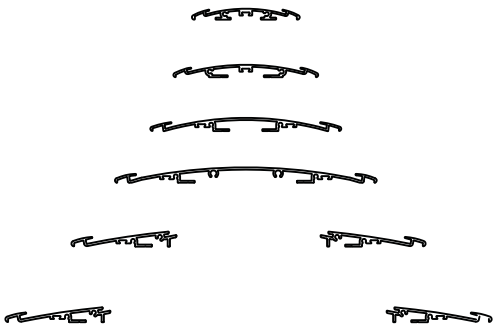

+7 (499) 649-14-16
info@vs-gs.ru
www.vs-gs.ru

Vista Nova offers modified widths to fit standard paper sizes:

- Standard paper size A8 (52mm)
- Standard paper size A7 (74 mm)
- Standard paper size A6 (105mm)
- Standard paper size A5 (148mm)

Of course, bigger signs can be assembled – such as A4, A3 and beyond using the one sided profile of the system.

Standard finishes for vista profiles are aluminum and black.

Vista Nova comes with modern designed metal end caps. The end caps are available with screws for maximum security to avoid vandalism. The metal end caps are made of aluminum with silver or black anodized finishes and include stainless steel screws.

With the proper graphic implementation on any flexible substrate, these signs are suitable for both indoor and outdoor purposes.

Vista Nova – including the highest standards of Vista System with a fresh, eye-catching look – is definitely the new star in the wayfinding arena!

Vista NOVA

Wall Frames

Wall Frames

Wall frames are ideal for displaying information. Vista Nova wall frames are very versatile. They come in many sizes and types and can be easily mounted. Portrait and landscape positions are available. Updating is quick and easy: just remove the printed insert and replace it with a new one. Braille inserts are supported.

Vista NOVA

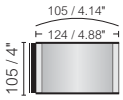

Projecting Signs

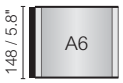

Projecting Signs

Vista Nova projecting signs, being perpendicular to the wall, are beneficial because they provide extra visibility not present in the other sign types and are more visible from a wide variety of angles. This type of signs is ideal for displaying all kind of information: directional, instructional, warning etc.

Directories

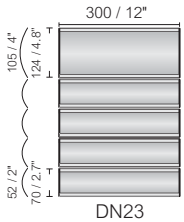

Directories

Wall directory signs are one of the best solutions for directional purposes and/or at-site entrances to increase visibility and orientation for hospitals, hotels, schools, office buildings, universities, airports, etc. Vista Nova offers several types of wall directories: Single sign directory, multi-panel directory and multi-signs directory.

Vista NOVA

Table Stands

Table Stands

Vista Nova table stands come in two different designs:

- Kangaroo style – a portrait positioned table stand
- Boomerang style - a landscape positioned table stand

Both types are designed to accept standard paper or other sign substrates. They are available in many sizes, and are very easy to assemble.

Vista NOVA

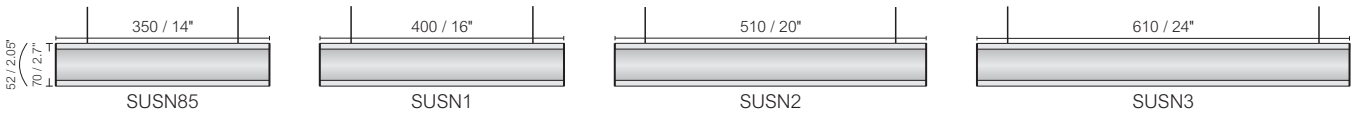

Suspended Signs

Suspended Signs

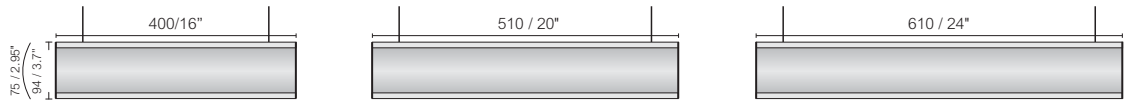

Vista Nova suspended signs are very elegant. They are mounted to the ceiling, so they are visible from a distance and can be seen from a wide range of viewing angles. For this reason they are ideal as way-finding signs at hospital hallways, shopping malls open areas , bank departments and so on.
